

# Sample Job Description

Role: AI Agent Engineer Intern

Responsibilities:

- Build AI workflow applications with Python and FastAPI.
- Use LangGraph or LangChain to manage multi-step agent workflows.
- Design prompt engineering, tool calling, memory, and evaluation modules.
- Connect OpenAI APIs to real product scenarios.

Requirements:

- Familiar with Python, FastAPI, OpenAI API, LangGraph, and Agent architecture.
- Understand RAG, tool calling, memory, and workflow orchestration.
- Able to explain project tradeoffs and show runnable demos on GitHub.
